Problem Statement –

Problem Statement: Travel Planner Agent

The Challenge

Planning a trip can be time-consuming and confusing. Travelers often struggle to choose destinations, manage their budget, create itineraries, and find suitable attractions. Information is scattered across multiple websites, making it difficult to plan an efficient and personalized trip.

The Objective

Build an AI-powered Travel Planner Agent that generates personalized travel plans based on user preferences. The solution should:

- Personalized Itinerary – Create day-wise travel plans based on destination, budget, duration, and interests.
- Budget Planning – Provide estimated travel, accommodation, food, and activity expenses.
- Tourist Attraction Recommendations – Suggest the best places to visit based on user interests.
- Travel Tips & Guidance – Recommend the best time to visit, local transport, safety tips, and essential travel advice.
- AI-Based Recommendations – Use the IBM Granite Foundation Model (watsonx Prompt Lab) to generate intelligent and personalized travel plans.

Proposed Solution:

The proposed solution is an AI-powered Travel Planner Agent developed using IBM watsonx Prompt Lab with the Granite Foundation Model. The system generates personalized travel plans based on the user's destination, budget, trip duration, and interests.

The solution provides:

- Personalized Travel Itinerary – Generates day-wise travel plans.
- Budget Estimation – Estimates expenses for travel, accommodation, food, and activities.
- Tourist Attraction Recommendations – Suggests popular places based on user preferences.
- Travel Tips – Provides safety guidelines, local transport information, and the best time to visit.
- AI-Powered Planning – Uses the IBM Granite model to generate accurate and personalized travel recommendations.
- Simple User Interface – Built using HTML, CSS, and JavaScript for easy interaction.

Technology Used:

1. IBM watsonx.ai – AI development platform for building and deploying AI applications.
2. IBM Granite Model – Granite-4-h small
3. IBM Cloud – Cloud infrastructure for hosting and managing AI services.
4. Retrieval Augmented Generation (RAG) – Improves responses by retrieving relevant travel information from external knowledge sources.
5. Vector Database – Stores and searches travel-related information efficiently using embeddings.
6. VS Code – Development environment.
7. GitHub – Version control and project management.

Novelty and Uniqueness:

1. Uses Generative AI (IBM Granite Model) to create personalized travel plans based on user preferences.
2. Provides AI-driven recommendations instead of fixed travel packages.
3. Uses RAG (Retrieval Augmented Generation) to provide more relevant and context-aware travel information.
4. Automatically generates complete itineraries including destinations, activities, and travel suggestions.
5. Reduces the time and effort required for manual trip planning.

Future Scope:

1. Integration with real-time flight, hotel, and transport APIs for live booking assistance.
2. Addition of voice-based interaction for easier user communication.
3. Use of real-time weather and location data for better travel recommendations.
4. Support for multiple languages to help more users.
5. Integration with maps and navigation services for route planning.
6. Development of a mobile application for convenient access.

1. Day-wise Itinerary

Day 1:

- Morning: Arrival in Goa. Check-in at the hotel and freshen up.
- Afternoon: Visit Fort Aguada and Sinquerim Beach. Enjoy the serene beauty and take a stroll.
- Evening: Visit the famous Calangute Beach. Enjoy water sports like parasailing, jet-skiing, and banana boat rides.

Day 2:

- Morning: Visit Old Goa, a UNESCO World Heritage Site. Explore the Basilica of Bom Jesus and Se Cathedral.
- Afternoon: Lunch at a local restaurant. Post lunch, visit Anjuna Beach and explore the famous flea market.
- Evening: Visit Vagator Beach and enjoy the sunset. You can also dine at a beach shack.

Day 3:

- Morning: Visit the Dudhedar Waterfalls. It's a bit far from the city, but the view is worth it.

5. Travel Tips and Safety Advice

- Always carry a water bottle with you to stay hydrated.
- Use sunscreen to protect your skin from the harsh sun.
- Try to avoid traveling late at night, especially alone.
- Always keep a copy of your identification and important documents.
- Respect local customs and traditions.
- Try to bargain while shopping at local markets.
- Always prefer licensed taxis or auto-rickshaws for local transport.
- Try local food, but ensure it's hygienically prepared.
- Always keep your hotel's contact information handy.
- In case of any emergency, dial 100 for police assistance, 102 for ambulance, and 108 for fire services.
